**Distinguished Scholar Seminar
Friday, July 15, 2011 at 1:00pm**

Gerald Nelson

Senior Research Fellow at the
International Food Policy
Research Institute (IFPRI) in
Washington, DC

**Title: “Food Security, Farming, and Climate Change
to 2050: Scenarios, Results, Policy Options”**

Abstract: This seminar presents the results of a December 2010 study by IFPRI researchers on how climate change exacerbates the already-large food security challenges we face. Scenarios to 2050 illustrate both the magnitude of the challenge as well as the consequences of the uncertainties in both socioeconomic and climate futures. The study, and added information, is available at www.ifpri.org/climate-change.

**ROOM CHANGED TO 349 REITZ UNION
FOR ADDITIONAL SEATING**
